

FIRST Robotics Team Takes Home Honors at Regional Competition

At the FIRST Robotics Finger Lakes Regional Competition held at RIT earlier this month, the Harris Corporation and Penfield High School Team 1511 brought home one of the highest honors –the Engineering Inspiration Award! The award celebrates the team’s outstanding success in advancing respect and appreciation for engineering and engineers, both within their school as well as their community.

Congratulations go out to the entire team! Special thanks to all of the Harris mentors, to Pat Pendell for being a judge at the competition, and to the RFCD model shop staff, who helped the team throughout the year.
